

# MOSAIC OF LIFE

The scientific seminars originated by Global Gold's manufacturing company have resulted in a series of revelations that I have titled "Mosaic of Life".

L. Scott McKnight ..... Co-Chair and CEO of Global Gold & Liquidity International

Dr. Robert Davis

Several years ago, Dr. Robert Davis of The University of Pennsylvania came to Dallas to share some astounding research. Dr. Davis found that aloe vera would increase wound healing by 121%. It did this by stimulating the fibro blast. Dr. Davis made this comment. "Aloe not only delivers nutrients to the body but it seems to have a zip code and knows where to deliver the nutrients." (Remember that phrase: "Seems to have a zip code.")

Dr. Terry Moule (England)

Dr. Moule had a friend who developed cancer. He treated it for ten years with a high quality aloe that Aloe Commodities sent to him. When the friend passed away from something other than cancer, an autopsy was performed and it was discovered that the cancer cells had been restrained by a film, or cap, that had stopped the cancer from spreading.

Dr. Li (Korea)

Dr. Li received the \$10,000 grant from the International Aloe Science Council for his study, whereby he injected lab animals with live cancer cells, then contained the spread of the cancer with regular doses of quality aloe vera.

Dr. Lawrence Plaskett (Great Britain)

Dr. Plaskett selected 31 patients who had been diagnosed with terminal cancer (6 months or less to live). He gave them high quality aloe sent to him by Aloe Commodities. Dr. Plaskett also included coffee enemas and a very strict diet. Forty-four months later, all 31 patients were alive and two patients had a complete remission, seven had a partial remission, and 22 were stabilized.

Dr. Byung Pal Yu (University of Texas Health Science Center)

Dr. Pal Yu took 240 lab animals and divided them into two groups of 120 animals each. All 240 animals were the same; they were in the same environment, and had exactly the same diet. Group A (120 animals) had aloe vera to drink, and Group B (120 animals) had only water to drink.

This study yielded three significant facts:

1. The animals drinking aloe lived 10% longer.
2. The animals drinking aloe had 39% less cancer.
3. The animals drinking aloe had 56% less heart attacks and strokes.

Dr. Pal Yu brought a slide showing a cross section of the liver from an animal from each group. The liver from the Group B animals had hard spots and channels and was 40% as effective as a new liver. The liver from the Group A animals was grayish-pink. It looked like a new liver and was over 90% as effective as a brand new liver.

Mosaic of Life

As President of the International Aloe Science Council two and one-half years ago, we called for a retreat for one day to consider our industry. At this meeting, Don Loveless suggested that if the world of people who already take vitamins daily would take them with aloe, they would get so much additional benefit as suggested by Dr. Robert Davis' study. We retained Dr. Joe Vincent at Scranton University to conduct the following experiment.

A group of people took Vitamin C with water, than the same group took Vitamin C with aloe. Aloe delivered 304% more Vitamin C than when taken with water.

Dr. Vincent then gave a group of people Vitamin E, an oil-based vitamin, first with water, than later with aloe. When taken with aloe, the Vitamin E was 369% more bio available to the body.

The next study was shown to me only two weeks ago. A pharmaceutical research firm was given a \$4.5 million grant to find a more efficient delivery system for medications to the body. After extensive testing, the company discovered that a chain of polysaccharides would deliver the medications more efficiently. The major polysaccharide in the chain was the aloe polysaccharide, and an important component was the mannose. The mannose in this delivery system seemed to know where to deliver the benefits. (Remember "the zip code"?) This delivery system is so accurate, that it delivers it right into the lectins and destroys the DNA of the cancer cell.

The last study was done by the University of Georgia, whereby they proved that our Vito mannan patented product contained 276% more mannose than the best known polysaccharide in the industry.

\*\*\*\*\*

Study this information. Ponder the seemingly incredible "mosaic" presented by these studies.

Know that LiquiVida contains a high concentration of the best aloe.  
LiquiVida is the only beverage in the world that has patented Vitomannan in it.

LiquiVida is loaded with antioxidant and anti-aging properties and will be in the refrigerator of every single person that I care about!

It is very important that you do not claim to cure any disease.

You do not prescribe; however, you can share LiquiVida with everyone you know or come in contact with, knowing for sure that it will help the body function on its own as it should, naturally. People will expect a longer, healthier life...a life more free of disease.

L. Scott McKnight ..... Co-Chair and CEO of Global Gold & Liquidity International

LiquiVida™  Tastes Great!

Manufactured Exclusively For: Liquidity International Dallas, Texas
