

Shipping Estimator

Use Customer Order Worksheet w/ weight extensions

In order for you to provide your clients an answer on how much is it going to cost for shipping smaller orders we suggest that you go to www.freightquote.com

You will be able to register and set your own password.

Click on USA

Click less than a truckload

Use **78669** as origin

Click business with dock

Fill in destination zip code

Click business with dock

Click single

Scroll to new commercial goods

Scroll pallets

Scroll class 70

Enter total weight of order

Put in 48 w 48 L 36 h for size, rarely will you go more than 48 high

Leave additional service blank

4x4' pallets are more economical

We do ship 8ft rails & shelves on 4x8 pallets

I suggest you average the top 3 just to give yourself some leeway.

A freightquote.com rep will likely give you a call...its fine to simply say you are using it as a quoting source and that all TrakRack shipping orders will be executed by our warehouse shipping company who has their own account already.

Freightquote.com automatically allows for 50 free quotes

You might also check out UShip.com

Any questions or suggestions please give me a call...especially for more information when shipping multiple pallets, truckloads and containers.
