

Hydrating Cleanser

Designed to cleanse the skin of surface impurities for both women & men. The special blend of ingredients work synergistically to hydrate, clarify and brighten the skin. Liquidity's Hydrating Cleanser may also be substituted as a shaving creme. Promotes a clean close shave. The refreshing smell is created from an essential oil thus eliminating the use of fragrances. No animal testing is used with the product.

Benefits

The special blend of ingredients helps to cleanse and brighten the complexion. As it dissolves surface impurities. The Hydrating Cleanser will help remove make-up and may also be used as a shaving creme. The refreshing smell is created from an essential oil thus eliminating the use of fragrance. No animal testing is used with the product.

Who Can Use It

Both Men and Women with Normal to Dry skin types. Due to the nature of the ingredients, some people with oily and sensitive skin types have reported success with the products.

Directions

Cleansing should take place every morning upon awakening and every night before retiring.

Cleansing the face before retiring is very important, especially if makeup is present on the skin, as studies have indicated sleeping through the night with a dirty face may prematurely age the skin.

Many times people will ask why they need to cleanse upon rising, especially if they have cleansed before retiring. The reason for cleansing every morning, as we sleep the body works to renew itself and during this time oils and perspiration are secreted, thus resulting in a need to cleans the skin. Cleansing the face with Liquidity's Hydrating Cleanser will help you began the day with a clean and refreshed complexion.

To apply the Hydrating Cleanser... one should wet their skin and apply a sufficient amount of cleanser to cover the entire face and neck area. Gently circulate the cleanser on the skin and enjoy the stimulating feeling as your skin is bathed in ingredients that clean, refresh and brighten. Avoid getting into the eye, but if the cleanser does get into the eye rinse with cool water.

Liquidity's Hydrating Cleanser is effective in removing make-up from the skin. It is advised to apply the cleanser twice when makeup is present. The first application should help remove the makeup and the second application will provide a finished cleansing. To better help in the removal of makeup a clean cloth or skin chamois may be helpful.

Liquidity's Hydrating Cleanser is also good for shaving. May be used on the face or legs. The ingredients help create a clean close shave and leave the skin leaving soft and supple.

Ingredients

Aloe Vera - A proven cleansing aid that is recognized to have hydrating, softening, healing, antimicrobial, and anti-inflammatory properties. Its moisturizing abilities quickly help to regulate dry skin, leaving the skin with a moist feeling after cleansing.

Jojoba Oil & Jojoba Esters – The oil benefits the skin, as it helps to diffuse surface impurities. It also helps to moisturize the skin and helps keep it soft and supple and not feeling dry after cleansing. The Jojoba Esters help to dislodge build up of dead skin cells and promote brightening to the skin.

Hydrolyzed Wheat Protein - Helps as it smoothes wrinkles and lines.

Special Extracts –

Green Tea Extract – A powerful antioxidant with abilities to penetrate into a cell, thereby protecting the cell from free radicals and associated damage thus helping with antiaging.

Nettle Extract - Employed for therapeutic purposes and antioxidant properties.

Willow Bark Extract – Skin clearing properties.

Allantoin – Helps stimulate new tissue growth.

Tocopherol Acetate – (Vitamin E) A powerful antioxidant containing skin-moisturizing properties.

Retinyl Palmitate – (Vitamin A) Physiologically, stimulates the production of epidermal protein and increases skin elasticity. Cosmetically, retinyl palmitate is used to reduce the number and depth of fine lines and wrinkles and prevents skin roughness resulting from UV exposure.

Sage Oil – Considered having astringent, antibacterial, antiseptic, anti-inflammatory, stimulating, softening, invigorating, and healing properties. The extract is obtained from the herb's leaves.

Hydrating Toner

Liquidity's Hydrating Toner is formulated with high quality Aloe Vera gel and other special ingredients, which help to hydrate, soothe, refresh, restore natural pH, nourish, energize and tone the skin. Liquidity's Hydrating Toner helps to remove any last trace of cleanser that might be left on the skin after cleansing. The Toner may also be used periodically during the day to refresh the skin. The refreshing smell in the Toner is created from the essential oil of Sage. No alcohol is present and no animal testing is used with the product.

Benefits

Liquidity's Hydrating Toner helps to remove any last trace of cleanser that might be left on the skin after cleansing.

The Toner may also be used periodically during the day to refresh the skin.

The refreshing smell in the Toner is created from the essential oil of Sage.
No alcohol is present and no animal testing is used with the product.

Who Can Use It

Men and Women with Normal, Dry and Sensitive skin types

Due to the special ingredients used in the formula, some people with oily skin have reported successful results

Directions

For maximum benefits, apply the Hydrating Toner after cleansing the skin with Liquidity's Hydrating Cleanser.

Women may prefer Applying Liquidity's Hydrating Toner with a cotton puff or men may prefer to apply like an after shave by sprinkling Toner into hand and patting onto the skin.

Ingredients

Purified Water – Water is essential to the skin. Water is a natural cleanser and helps to hydrate the skin. The water used in Liquidity's products is purified and filtered by a reverse osmosis process.

Aloe Vera Gel – Since ancient times Aloe Vera gel has been used as a natural cleanser and moisturizer. The molecular structure allows Aloe Vera to penetrate the skin, supplying moisture directly to the tissue. Other properties include moisture regulation and an apparent ability to absorb UV light. It has a slightly relaxing effect on the skin, making it beneficial for sensitive, sunburned, and sun exposed skins.

Sodium PCA (Ajidew NaPCA) – a high performance humectant due to its moisture-binding ability. It is derived from amino acids. Sodium PCA is considered noncomedogenic and nonallergenic and it is recommended for dry, delicate, and sensitive skins.

Hydrolyzed Glycosaminoglycans – has hygroscopic properties and a small molecular structure that favors penetration into the outer epidermal layers. May help relieve stress and aging in the skin

Soluble Collagen - Its great hydration potential has the amazing ability to bind and retain many times its weight in water. This water binding and retention ability makes collagen effective as a

protecting agent. As a film former, collagen aids in reducing natural moisture loss, thereby helping hydrate the skin.

Butylene Glycol (and) Panax Ginseng Root Extract – These two ingredients are helpmates to each other. The Butylene Glycol has antimicrobial action and when blended with the Panax Ginseng Root Extract. When combined the two help with special benefits such as diminishing wrinkles and relieving dry skin. The active components of the Ginseng's root include; ginsenosides and are said to be responsible for the revitalization and reactivation of epidermal cells. Important constituents include saponins, mucin, vitamin B, and ginsenoside.

Panthenol(Vitamin B-5) – Panthenol appears to stimulate cellular proliferation and aid in tissue repair. The Vitamin B-5 in Panthenol helps to impart a nonirritant; nonsensitizing, moisturizing, and conditioning feel and may help promote normal keratinization. Panthenol helps to protect the skin against sunburn and provides relief for existing sunburn. Its humectant character enables it to hold water in the product or attract water from the environment, resulting in a moisturizing effect. As a skin softener it provides suppleness. It is considered noncomedogenic.

Allantoin – Found in the Comfrey Root this ingredient is believed to help in the aid of healing damaged skin by stimulating new tissue growth.

Salvia Officinalis (Sage) Oil – Obtained by distillation of sage leaves and flowers. The essential oil adds the natural aroma to the Hydrating Toner.

Ageless Serum

Secrets to helping skin age less can be found in natural plants and herbs. Liquidity has blended such plants and herbs and may have truly embarked upon the serum that could possibly be the AGE-LESS SERUM of the century. Extracts from natural plants and herbs used in the AGE-LESS SERUM may help maintain or restore the skin's elasticity and strength producing a more youthful appearance. Special ingredients may also help to lighten discoloration such as age spots. The

AGE-LESS SERUM is delicate enough to use around the lip and eye area where lines are prone to appear and expose signs of aging. The serum may also be helpful in diminishing dark circles under the eye area. In addition, it may be helpful on the neck and upper chest area where the skin becomes thin and lines often appear. Smoothing lines and wrinkles, diminishing dark circles and firming and toning the skin may be the ultimate experience with daily applications of the AGE-LESS SERUM. No animal testing is used with the product.

Benefits

Extracts from natural plants and herbs used in the AGE-LESS SERUM may help maintain or restore the skin's elasticity and strength producing a more youthful appearance. Special ingredients may also help to lighten discoloration such as age spots. The AGE-LESS SERUM is delicate enough to use around the lip and eye area where lines are prone to appear and expose signs of aging. The serum may also be helpful in diminishing dark circles under the eye area. In addition, it may be helpful on the neck and upper chest area where the skin becomes thin and lines often appear. Smoothing lines and wrinkles, diminishing dark circles and firming and toning the skin may be the ultimate experience with daily applications of the AGE-LESS SERUM. (No animal testing)

Who Can Use It

Men and Women with all skin types Normal, Oily, Dry, Dehydrated, Sensitive and Aging.

Directions

Using the easy to use dropper, apply a few drops onto face and gently smooth over cleansed skin. The AGE-LESS SERUM is best used after cleansing with Liquidity's Hydrating Cleanser, followed by the Hydrating Toner.

The AGE-LESS SERUM is especially usefulness around the eye and mouth area one should use caution when applying to these delicate areas. (If the serum accidentally gets into the eye, rinse with clean cool water). When applying to the eye area, the SERUM may be used on the outer corners of the eye area and between the eyes on the brow area. Under the eye the SERUM may be helpful with dark circles and lines. When Applying under the eye use only as close as the extension of the lower lashes.

Allow the SERUM to dry before applying the Hydrating Moisturizer, as this will allow time for the skin to enjoy the ultimate benefits the AGE-LESS SERUM offers.

Ingredients

Purified Water – The first known natural hydrating moisturizer. Water is essential for proper functioning of the skin.

Aloe Vera Gel – A natural hydrating moisturizer. The molecular structure allows the aloe gel to penetrate the skin, supplying moisture directly to the tissue. Other properties include moisture regulation and an apparent ability to absorb UV light thus helping guard against sun damage to the skin which can cause lines, wrinkles and skin cancers.

Butylene Glycol and Extract Blends - The antimicrobial activity of the butylene glycol combined with the special fruit extracts of Vaccinium Myrtillus, Saccharum Officinarum, Acer Saccharinum, Citrus Aurantium Dulcis and Citrus Medica Limonum, synergistically work to soften and exfoliate dry and dead skin cells which may help to smooth lines and diminish wrinkles.

Hydrolyzed Elastin – Helps penetrate epidermal layers and improve overall skin appearance, softness and suppleness. Also acts as a surface protective agent alleviating the effects of dry skin, enhancing flexibility, improving feel, increasing and improving the tension of the skin and influencing formation of tropocollagen fibers when used with soluble collagen.

Soluble Collagen – Its great hydration potential has the amazing ability to bind and retain many times its weight in water. This water-binding and retention ability makes collagen effective as a protecting agent. As a film former, collagen aids in reducing natural moisture loss, thereby helping hydrate the skin. When combined with Elastin, the two form a binder strengthening the skin.

Ubiquinone (Coenzyme Q-10) – Powerful antioxidant properties help to brighten and deliver clarity to the skin.

Hydrolyzed Glycosaminoglycans – Contains moisturizing and firming properties that reportedly leave the skin smooth and soft and minimize wrinkle appearance. The small molecular structure allows easy penetration into the outer epidermal layers. Recognized as helpful to stressed and aging skin.

Panthenol – Derived from the Pro-Vitamin B-5 complex group. It helps deliver vital nutrients at the intercellular level and stimulates cellular proliferation and aids in tissue repair. Considered a noncomedogenic.

Allantoin – Derived from the comfrey root, it is considered nonallergenic. It is believed to aid in the healing of damaged skin by stimulating new tissue growth.

Sodium PCA (Ajdew NaPCA) - Due to the moisture binding ability it is recognized as a high performing humectant. It is considered nonallergenic and noncomedogenic and helpful for dry, delicate and sensitive skin types.

Sodium Hyaluronate – Capable of binding 1800 times its own weight in water, sodium hyaluronate is used as a moisturizing agent, viscosifier and emulsifier.

Triethanolamine – a pH balancer

Ascorbic Acid (Vitamin C) – A well know antioxidant, which helps in repairing free radical damage and adds protection against UVB damage which can also help counteract premature aging and skin cancers. Vitamin C also acts as a collagen biosynthesis regulator. It is known to control intercellular colloidal substances such as collagen, and when formulated into the proper vehicles, can have a skin-lightening effect.

Salvia Officinalis (Sage) Oil – Contains antibacterial properties. The Sage Oil is obtained by distillation of sage leaves and flowers to produce the essential oil needed for the calming aroma.

Age-Less

A luxurious facial experience, which allows one to age gracefully without having to let wrinkles appear. Liquidity's AGE-LESS LIFT is easy to use and delivers immediate results. The AGE-LESS LIFT works to diminish signs of aging For those who have not experienced signs of aging,

the AGE-LESS LIFT may help to maintain their youthful appearance. Liquidity's AGE-LESS LIFT is uniquely age-less. Easy to apply and Delivers immediate results. Aged skin may notice a more youthful appearance as lines and wrinkles diminish. May also help in line prone areas around the eyes and lips. Youthful skin may notice continued youthful skin and may possibly avoid lines or wrinkles. Discoloration or uneven skin tone may diminish. Skin's texture may be toned and firmed. Reduction of large pores and acne scarring may be reduced. No animal testing is used with the product.

Benefits

Easy to apply and delivers immediate results.

Mature skin may notice a more youthful appearance as lines and wrinkles diminish. The Ageless Lift may also help with lines around the eyes and lips.

Youthful skin may notice continued youthful appearance and with continued use may possibly avoid lines or wrinkles.

Discoloration and uneven skin tones may diminish.

Skin's texture may be toned and firmed.

Reduction of large pores and acne scarring may be reduced.

Who Can Use It

Men and Women with all skin types Normal, Oily, Dry, Dehydrated, Sensitive

Directions

For optimum results, use twice weekly until desired results are achieved. Thereafter may be used at least once weekly to maintain benefits.

Steps for use:

1. Prepare the skin

Cleanse face and neck area with Liquidity's Hydrating Cleanser.

Apply the AGE-LESS SERUM to cleansed area.

2. Apply Ageless Lift

To apply the AGE-LESS LIFT to prepared face and neck area, pour a small amount into the palm of your hand. Moisten fingertips of opposite hand and use fingers to smooth onto skin. Smooth in an upward and outward direction as described in our diagram . View Diagram

Allow the AGE-LESS LIFT to dry completely, approximately 20 –25 minutes.

The best position to place yourself while the lift is drying is to lie on your back with your face toward the ceiling, elevate your feet slightly, play your favorite music and allow yourself time to relax and enjoy your facial.

While the AGE-LESS LIFT is drying you may experience a slight tingling sensation on your face and neck area. This sensation may help to dislodge dry and dead skin cells and lighten skin discoloration.

You may also experience a slight pulsating sensation as the AGE-LESS LIFT begins the drying process. This is usually caused from the compression of the AGE-LESS LIFT on the skin. This compression creates an isometric exercise. This reaction may help to diminish lines and wrinkles and tone and firm the skin. The exercise may also help diminish acne scarring and acne discoloration.

3. Removal of Ageless Lift

Apply an even coverage of the Hydrating Cleanser over the AGE-LESS LIFT.

Wet a clean cloth with warm water and place cloth over face and neck area. This will soften the AGE-LESS LIFT and allow easy removal. Rinse with warm water until the AGE-LESS LIFT is completely rinsed from the face and neck area.

When removed, step back from mirror and see and feel the difference. You will want to pay particular attention the eye, cheek and jaw areas of your face. Notice how the AGE-LESS LIFT works to tone, lift and smooth. If wrinkles were present before the application of the AGE-LESS LIFT you may notice diminished effects.

4. Finishing Touches

After the AGE-LESS LIFT is removed from the skin, apply Liquidity's Hydrating Toner. This may be applied with a cotton puff or by sprinkling into hand and patting onto the skin.

Next apply Liquidity's AGE-LESS SERUM to the face and neck.

Finish with Liquidity's Hydrating Moisturizer and smile and enjoy!

Ingredients

Acacia Senegal Gum – Derived from the stems and branches of various species of the African acacia tree. The gummy sap provides soothing and anti-inflammatory properties.

It has been recommended for dry, sensitive, or delicate skin and is also accepted for oily skin as well.

Purified Water – A natural hydrating moisturizer. Water is essential for proper functioning of the skin.

Corn Starch – Soothing to the skin and is used as a thickening agent for the product.

Aloe Vera Gel – A natural hydrating moisturizer with anti-aging properties. Helps to repair damaged skin tissue. Aloe vera is also known as a carrier, as it helps deliver other vital ingredients to target locations.

Carrageenan – A polysaccharide from seaweed extract. Commonly used by the Chinese and Polynesians for healing properties. Seaweed is found to be stimulating, revitalizing, and nourishing. It is anti-inflammatory and has disinfectant abilities. It has potential tissue renewal action and positive effects on facial wrinkles. It protects sensitive skin against irritation. It is also known to help with mature dry skin due to its smoothing and softening actions. The extract has been effective in treating acne based on its presumed antibiotic properties that offer the skin protection against infection. It has been reported to aid in improving blood circulation. The plant has a wealth of vitamin content that includes vitamins A, B1, B2, B3, B5, B12, C, D, E and K.

Silk Amino Acid – Known for its low molecular weight the silk amino acid helps to penetrate the corneum layer. It aids in protecting the skin from dehydration and leaves it with a smooth feel. Has been very effective for use in diminishing wrinkles.

Extracts –

Grape Seed - antioxidant properties. Helps to reduce redness in the skin. Helps with antiaging. Contains Vitamin C, chlorophyll and enzymes.

Hypericum – Helps to improve capillary circulation. It is also an antibiotic and therefore a natural preservative.

Arnica – Effective in helping treat damaged, reddened, or tired skin. Helps with circulation stimulation and promotes the removal of wastes from the skin. Also helps with promotion of new tissue growth.

Witch Hazel – Found effective against free radicals as it counters the effects of UVA by its antifree radical activity while acting as a UVA and UVB absorber.

Horse Chestnut – Benefits attributed to this botanical include circulation promotion. Also known for its tannic acid content, which provides toning and astringent properties.

Ivy- Containing Vitamin P, Ivy Extract is studied for its properties, which help reduce capillary wall permeability. This extract seems to improve massage tolerance of sensitive skin.

Green Tea – A powerful antioxidant. Helps protect the cell from free radical damage.

Ginseng – Helps with diminishing wrinkles and is good for dry skin. It is also said to aid in increasing skin elasticity, rejuvenating, oxygenating, and stimulating. The root's active components are called ginsenosides, and are said to be responsible for the revitalization and reactivation of epidermal cells.

Salvia Officinalis (Sage) Oil – Contains antibacterial properties. The Sage Oil is obtained by distillation of sage leaves and flowers to produce the essential oil needed for the calming aroma.

Hydrating Moisturizer

Designed to hydrate and moisturize the face and neck and protect the skin from environmental agents that can prematurely age the skin. Ingredients in Liquidity's Hydrating Moisturizer work

synergistically to fight against harmful environmental agents that daily attack the skin. Agents that attack the skin and cause premature aging are agents such as artificial heating and cooling, artificial lighting, wind, sun, dry climates, stress, medications, etc. When using Liquidity's Hydrating Moisturizer on a daily basis the ingredients counter attack the agents, which result in premature aging. The refreshing smell is created from an essential oil thus eliminating the use of fragrance. No animal testing is used with the product.

Benefits

Ingredients in Liquidity's Hydrating Moisturizer work synergistically to fight against harmful environmental agents that daily attack the skin. Agents that attack the skin and cause premature aging are agents such as artificial heating and cooling, artificial lighting, wind, sun, dry climates, stress, medications, etc. When using Liquidity's Hydrating Moisturizer on a daily basis the ingredients counter attack the agents, which result in premature aging.

Who Can Use It

Both Men and Women with Normal, Dry and Sensitive skin. While the formula is primarily designed for normal, dry and sensitive skin types, some clients with oily skin have reported good results.

Directions

For maximum results, before application of Hydrating Moisturizer prepare the skin by using Liquidity's Hydrating Cleanser followed by the Hydrating Toner and AGE-LESS serum.

After skin is prepared apply the Hydrating Moisturizer. Smooth over entire neck and face area in an upward and outward motion. Use sparingly for normal skin and less sparingly for dry to extra dry skin.

Ingredients

Aloe Vera Gel – Its moisturizing ability is its most widely recognized characteristic. Although aloe Vera's important constituents are minerals, polysaccharides, amino acids, and carbohydrates, it is constituted of about 99.5% water. The molecular structure allows Aloe Vera to penetrate the skin, supplying moisture directly to the tissue. Other properties include moisture regulation and an apparent ability to absorb UV light. It has a slightly relaxing effect on the skin, making it beneficial for sensitive, sunburned, and sun-exposed skins.

Jojoba Oil – Studies indicate rapid penetration ability by means of absorption. From these areas, it seems to diffuse into the corneum layer and acts with intercellular lipids to further reduce water loss. Jojoba Oil is the purest oil known to mankind and is antimicrobial. Jojoba oil is a naturally occurring ester and is generally considered noncomedogenic.

Hydrolyzed Elastin – Penetration to epidermal layers is possible due to the small molecular size, thereby improving overall skin appearance, softness and suppleness. Also acts as a surface protective agent alleviating the effects of dry skin, enhancing flexibility, improving feel, increasing and improving the tension of the skin, and influencing formation of tropocollagen fibers when used with soluble collagen.

Soluble Collagen – Its great hydration potential has the amazing ability to bind and retain many times its weight in water. This water-binding and retention ability makes collagen effective as a protecting agent. As a film former, collagen aids in reducing natural moisture loss, thereby helping hydrate the skin. When combined with Elastin, the two form a binder strengthening the skin.

Sodium PCA – A high-performance humectant due to its moisture-binding ability. It is derived from amino acids and exists naturally in the skin as a component of the natural moisturizing factor. It is considered noncomedogenic and nonallergenic and is good for dry, delicate and sensitive skins.

Green Tea Extract – A powerful antioxidant and antimicrobial ingredient. Has the ability to penetrate the cell of the skin and protect the cell from free radicals and associated damage thus adding the antiaging benefit.

Panthenol – (Vitamin B-5) – Acts as a penetrating moisturizer. Panthenol appears to stimulate cellular proliferation and aid in tissue repair. The Vitamin B-5 action helps to impart a nonirritant; nonsensitizing, moisturizing, and conditioning feel and may help promote normal keratinization. Panthenol protects the skin against sunburn, provides relief for existing sunburn and enhances the natural tanning process. Its humectant character enables panthenol to hold water in the product or attract water from the environment, resulting in a moisturizing effect. As a skin softener it provides suppleness. Considered noncomedogenic.

Soy Bean Oil – It has a small molecular structure and is thought to act more as a hormone-like cellular messenger once it reaches the epidermal keratinocytes and, particularly, the dermal fibroblast. It is said to stimulate the synthesis of collagen, elastin, proteoglycans, and structural glycoproteins. Soy Bean Oil contains smoothing ingredients and has a high content of phosphatides such as lecithin and Vitamins A, E, and K. It is reported as anti-irritating and noncomedogenic.

Avocado Oil – Helps as a carrier to transport active substances into the skin. Its skin-benefiting properties include bactericidal and soothing properties. Current speculation among researchers is avocado oil may mobilize and increase the collagen of connective

tissue. Avocado Oil has also demonstrated sun-screening characteristics and has been given the highest ranking by the Encyclopedia of Chemical Technology for sunscreen effectiveness when compared to other naturally derived oils such as peanut, olive and coconut. Avocado oil also contains other constituents such as; lecithin, phytosterol, carotinoids, and a high concentration of vitamins A, D and E. The oil is derived from the expression of the seed.

Butylene Glycol (and) Matricaria Recutita Extract – These two ingredients are helpmates to each other. The Butylene Glycol has antimicrobial action and when blended with the Matricaria Recutita Extract it enhances the preservative activity. The Matricaria Recutita Extract is from the chamomile family and is aromatic, and its flower heads are used to obtain the blue chamomile oil. The active principles are a pale blue volatile oil (which may turn yellow with keeping). The chamomile factor is considered a capillary wall constrictor and is used for cooling and healing. It is good for acne, dry and supersensitive skin. And in addition it is noncomedogenic.

Tocopheryl Acetate – (Vitamin E) An antioxidant that helps as a free radical scavenger.

Retinyl Palmitate – (Vitamin A) A skin conditioner used to help reduce the number and depth of fine lines and wrinkles, and prevent skin roughness resulting from UV exposure. Secondary reactions such as dryness or irritation are not associated with retinyl palmitate. It is even more effective when used in combination with * Ascorbic Acid (Vitamin C) because it achieves greater penetration.

*Ascorbic Acid – (Vitamin C) Derivatives are said to have skin-lightening and antioxidant properties. The antioxidant properties help with the war against free radicals. When evaluating its ability to fight free-radical damage in light of its synergistic effect with vitamin E, Vitamin C shines. As vitamin E reacts with a free radical, it, in turn, is damaged by the free radical it is fighting. Vitamin C comes in to repair the free-radical damage in vitamin E, allowing the E to continue with its free-radical scavenging duties. Current research has indicated the synergism between vitamins C and E can yield even better results when used together in helping to protect the skin against harmful UVA and UVB rays.

Glycereth-26 – This ingredient has been studied extensively for its moisturizing abilities. Based on data available, it has definitely been established as a good skin-moisturizing agent. The humectant properties help the skin retain moisture.

Salvia Officinalis (Sage) Oil – This essential oil is obtained by distillation of sage leaves and flowers. It is aromatic, therefore adds to the pleasant aroma of Liquidity's Hydrating Moisturizer. Sage Oil is also credited with depurative and healing properties.

Liquefying Makeup Remover

A special formula designed for quick and easy make-up removal. Liquefies instantly upon skin contact and quickly removes any trace of make-up, including waterproof mascara, camouflage, and clown makeup from the skin's surface without absorbing into the skin. You'll be amazed how quickly the makeup disappears. Liquefying Make-up Remover™ is water-soluble and will completely rinse free from the skin and will not leave an oily residue.

Skin Care Travel Kit

Includes Liquidity's: Liquefying Make-Up Remover, Hydrating Cleanser, Hydrating Toner, Age-Less Serum, Hydrating Moisturizer, and Age-Less Lift in an efficient carrying case that makes traveling with your skin care easy!

AloGlo

Liquidity's association with Greystone Medical has enabled us to include a unique and exclusive ingredient known as QRX™ to the AloGlo formula. This patented ingredient has been shown to improve the quality of the skin. Blending QRX™ into the finest Aloe Vera and Glycolic Acid, while adding special moisturizing agents, enables the user to exfoliate with less irritation or drying of the skin.

Liquidity's AloGlo™ is designed to speed the exfoliation of dead skin cells and allow for dermal regeneration. This strategic formula may well be the answer toward a "re-born" skin.

AloGlo's unique formula brings innovation as it introduces a clinically proven and patented ingredient known as QRX™. QXR represents a potentially significant breakthrough in slowing the aging process in the human dermis. When blended with a high concentration of the finest Aloe Vera and Glycolic Acid, this trio may defy all other exfoliates.

AloGlo's amazing ability to work at peeling away dead skin cells while soothing inflammation, and paving the pathway for collagen biosynthesis while maintaining a moisturized and supple skin is an advancement for the skin exfoliation process.

AloGlo's recommended use is as follows:

Week 1:

Apply an even coverage to cleanse skin at nighttime.

During the first week you may experience an excessive amount of exfoliation of dead skin cells.

[Liquidity's Hydrating Oil](#) may help to soothe the dry skin and the [Age Less Lift](#) may help smooth away the dead skin cells quicker.

Week 2:

Apply morning and evening, after cleansing the skin with [Liquidity's Hydrating Cleanser](#). Follow cleanser with [Liquidity's Hydrating Toner](#) and then apply AloGlo. Wait approximately 10 minutes after applying the AloGlo and then follow with [Liquidity's Hydrating Moisturizer](#) for daytime protection.

During the second week you may experience some redness or you may experience varying degrees of slight tingling sensations. These symptoms are normal as the ingredients in AloGlo are working to bring about the exfoliation needed to rejuvenate the skin. A sensitive skin may experience more sensations than a normal skin. These temporary symptoms usually disappear within the first two weeks of use. Gradually, after the first two weeks, a "re-born" look may unveil itself as the mirror reveals an AloGlo!

Life Force 1000

LifeForce 1000 , a topical cream, contains the active ingredient QRX™ . This product is an anti-oxidant that oxidizes scavenging free radicals and helps prohibit the free radical negative interactions with the skin's cells. We believe many people may find that this product helps to smooth their skin and reduce scarring.

QRX™ is a derivative of red oak bark and was first recorded to be used by the North American Natives extensively for various skin maladies and disorders. It has been written that over the years, this natural tree bark extract was applied regularly to the skin for powerful immediate protection.

The real value of QRX™ is shown in its ability to normalize and rebalance the microenvironment of the extra cellular matrix (ECM).

QRX™ reduces scarring by:

- Supporting healthy skin tissue around the infected area;
- Supporting anti-oxidant activity; and
- Reducing inflammation.

QRX™ represents a potentially significant breakthrough in slowing the aging process in human dermis. Matrix metalloproteinases (MMPs) are zinc-dependant microproteins that are always present in human tissue. Aging dermis (skin) exhibits abnormally high levels of MMPs in comparison to younger, healthier dermis.

QRX™ applied topically, may reduce these MMP levels. By attaining proper MMP levels, it is hoped that many of the effects of aging can be markedly reduced in human dermis.

Internal or topical use may constitute a useful strategy for reducing normal dermal aging.

QRX™ may also be beneficial in scavenging free radicals (including superoxides) that appear to increase with age and may contribute to the aging of the skin.

Aloe Gele

A first aid kit in a tube, Aloe Gele may help with sunburns, minor cuts and scrapes, bruises, and insect bites. Aloe Gele™ contains a high quantity of superior quality Aloe Vera. Aloe Vera naturally contains a film-forming gum resin with hydrating, softening, healing, anti-microbial, and anti-inflammatory properties. Other properties of the Aloe Vera in Aloe Gele include moisture regulation and an apparent ability to absorb UV light making it beneficial for sensitive, sunburned, and sun-exposed skins. For use apply topically to affected area(s). Not recommended for internal use. *The Food and Drug Administration have not evaluated these statements. This product is not intended to diagnose, treat, cure or prevent any disease.

Ache-Less

Designed to help relieve aches from tired, sore or inflamed joint and muscle pain. AcheLess™ contains a high concentration of quality Aloe Vera. Aloe Vera's scientific proven abilities to aid inflammation makes AcheLess a must for muscle aches and pains. Topically apply to the affected area(s). Aches become Ache Less. *The Food and Drug Administration have not evaluated these statements. This product is not intended to diagnose, treat, cure or prevent any disease.
